 [IdaDanuarta](#)

My name is Ida Putu Sucita Danuarta, and I am a student at Primakara University majoring in Informatics. I have a strong passion for technology and design, with a focus on building innovative and impactful solutions.

I began my journey in the world of technology in August 2021, exploring foundational web technologies such as HTML, CSS, and JavaScript. Over time, I expanded my knowledge to include backend development, mobile development, database management, and modern frameworks.

Through dedication, curiosity, and perseverance, I have developed a solid understanding of web development. I thrive on solving problems, learning new skills, and collaborating with others to bring creative ideas to life.
